P riod for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 4, 10-28, 30 and 33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 6, and the examiner responding by including claims 1-3 as generic. Claims 20 and 21, as now amended, are drawn to the nonelected species of figure 3 rather than the elected species of figure 2 because of the inclusion of "helical" in claim 20, line 2, noting page 9, lines 17-21 of the specification.

Claims 1-3, 5-9, 34 and 35 rejected under 35 U.S.C. 102(e) as being anticipated by Tomonto (6,264,687) for the reasons set forth in paragraph 3 of the Office Action mailed Feb. 26, 2003. As to the new limitation in claim 5, lines 1-3, the Tomonto self expanding cells are considered to be formed by the self-expanding material that lies partly underneath the balloon expandable material. Thus, the Tomonto self expanding cells are bounded only by self-expanding material as claimed. The Tomonto self expanding cells are not bounded by balloon expandable material since the balloon expandable material lies above the self expanding cells.

Applicant's arguments filed June 17, 2003 have been fully considered but they are not persuasive. As to claim 1, although part of each of the Tomonto self expanding cells is covered by balloon expandable material, part of each of the self expanding

cells is not so covered. Thus, these cells are self-expanding as broadly claimed. As to claim 2, one half of the self-expanding cells at 80 of Tomonto are considered to be the claimed first self-expanding segment while the other half are considered to be the claimed second self-expanding segment. As to claim 34, Tomonto indicates that superelastic material is used to make stents self-expanding (col. 1, lines 39-56). If the bias of the superelastic material 110 was toward the contracted rather than the expanded state of the stent 10, this would be contrary to the function of the stent of supporting the walls of a blood vessel.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
